

# Career Outlook Assessment

Weekly Report 4: 9/9 - 9/15

In the growing age of computers and machinery, competition continues to grow in the technology industry. In order to gain a competitive edge over others with experience in the industry, gaining insight into the inner workings of software developers is essential.

This past week I had the opportunity to continue the ventures of researching my career and continue expressing this information in an assessment format. In doing so, my knowledge over the industry expanded in an exponential fashion.

Despite the ease of access to information because of the internet, expressing the information in a way that was meaningful to my personal character was rather challenging. In order to overcome this obstacle, I reflected upon what aspects were strengths and what aspects were weaknesses in my general character. Having done this, I matched up these characteristics with the required characteristics in the job of a software developer. Then I synthesized an overview on which aspects match up to those of a software developer and which I should start improving on in order to ensure myself a brighter future. By doing so, I feel prepared to take on the role of a software developer as I continue my ISM journey.

Reflecting for the future, being equipped with this knowledge, my potential to succeed has skyrocketed. Having being informed in-depth about the role of software developers on day to day basis, my confidence levels have increased to the extent in which I am comfortable talking about the career itself. With careers constantly changing year to year, knowing the most updated info is integral to the success of my ISM journey.

A circular logo with a light gray background and a dark blue border. Inside the circle, the letters 'SS' are written in a bold, dark blue, sans-serif font. The logo is positioned at the bottom center of the page, between two horizontal lines: a thick black line on top and a thick dark blue line on the bottom.
